Software Developer - iOS

BroadApp - Applications for the network edge ™

CANDIDATUL IDEAL:
Due to continuing growth we are looking to hire a Development Engineer, with experience in Apple iOS development.

Degree in Software Engineering or student in final years is required.

This is the ideal role for a talented Developer with a genuine interest in the telecommunication networks domain, looking to join a cutting edge company.

RESPONSABILITATI / BENEFICII:
To be considered, you must have:

1. Development experience in Apple iOS, for iPhone, iPad, iPod
2. Knowledge of mobile development best practices
3. Knowledge of client/server architectures

Good English level (spoken, written) is required.

You should also have the ability to deliver in a commercial software production, deadline driven environment, whilst working in a team. Short travel abroad missions for engaging with customers are required from time to time.

DESCRIEREA COMPANIEI:
Headquartered in Paris, France, ATES Networks (www.atesnetworks.com) is a leading provider of software solutions for mobile operators, service providers and financial institutions.

This job is opened for Craiova.
