SintecMedia

Job Description: Software QA Engineers

JOB PURPOSE

Software QA Engineers within SintecMedia are responsible for ensuring that our clients receive the best possible quality of software, by testing the releases for our broadcasting management software. This position may require some travelling outside of Romania.

MAIN DUTIES AND RESPONSIBILITIES

- Ensure best quality of SintecMedia media software deliverables
- Release management for part of our product releases
- Test scripting and execution based on functional specifications
- Assist in implementation and monitoring of QA procedures and methodologies
- Training on the product modules and other required areas

SKILLS AND EXPERIENCE

Required Skills

- Excellent written, interpersonal and verbal communication skills in English
- Knowledge and understanding of software development and QA lifecycle
- High degree of computer literacy
- Technical oriented skills and approach

Nice to Have

- Knowledge and understanding of QA methodologies and models
- Knowledge of SQL, XML and .Net Client-Server testing techniques
- Knowledge of automation tools and methodologies
- Excellent working knowledge in MSExcel and MSWord

Personal Attributes

- Ability to work in challenging international, multinational teams and manage own time
- Self motivated, with a high level of self discipline
- Patience, flexibility and attention to detail
- Delivery focused, with a flexible approach to work and willingness to learn new systems and business lines
- A methodical approach to problem solving and troubleshooting

If you are interested in this opportunity, please submit your CV to our office in Craiova, Romania, at:**cv@sintecmedia.com**.
